The guys behind the uploader / downloader site are part of the same university where I am a student. Since there is a nice boat a little north from our campus and a pleasant small village, a lot of people bring their masts here. For those of you who are unaware of this, masts are those big poles near the shore which you are using to attach your sails. The boat has a simple setup, so the mast isn't too tough to put up. The main problem for me is that I have never been good at sailing and so I have never dared to sail on my own. When it comes to using a smaller boat like this, I couldn't bring myself to even test the handle. The mast is really heavy and I couldn't help but wonder why we have this huge thing to simply sit on. Before I could test it, my friend did it and it was no problem, but I was definitely impressed by him doing it. It didn't take too long until he was getting good at it, but when I tried, I couldn't do it properly. I fell pretty much every time, which gave me a nasty black eye. Seeing how you guys can do it just fine, I guess my strong point isn't sailing, but rigging and moving the mast. It is also worth mentioning that you don't actually have to be master at rigging and moving the mast to use it, but simply having a friend behind you means that you don't have to worry about that. The mast itself is really sturdy and sturdy, which definitely makes me very happy. It's a traditional style, but it looks really good and I definitely love the length. A wooden mast is always much stronger than a metal one, which I hope that this one is. We really have fun talking here, which means we enjoy sharing movies we have shared and movies we haven't shared in our lifetime. We often share videos we have seen with our buddies and families during our time as a university student and so we are glad that now we can share our videos with you too. We try to share videos that we really like, but we also try to avoid videos that we don't like as much or even videos that are d0c515b9f4
